

NuERx Project Documentation

This PDF contains the complete documentation for the NuERx project.

It includes project ideas, backend AI scripts, frontend components, user dashboard, Docker setup, Nginx, SSL, and backup instructions.

1. Project Idea

NuERx is a video AI platform that automatically edits videos, adds music, generates previews, and allows short interactive clips for users.

2. B

Includes videoProcessor.ts, effects.ts, previewGenerator.ts, and videoRoutes.ts for video processing and API endpoints.

3. F

Includes VideoCard.tsx, VideoPlayer.tsx, ShortClipsCarousel.tsx, dashboard.tsx, login.tsx, and api.ts for fetching backend data.

4. D

Docker Compose configuration, Nginx for reverse proxy, SSL setup, persistent storage for videos, and daily backups.
